EE422C Project 3 (Word Ladder) Team Plan

Jake Klovenski jdk2595
Chris Oligschlaeger cgo328
Fall 2016

Jake did the DFS module, including the recurseDFSLadder and distance functions used within it, and Chris did the BFS, including the makeTree. Then we debugged each other's code with simple test cases. We got together for full testing with the stated test cases. Also, Jake wrote parse and Chris wrote printLadder.
We wrote 5 test cases together.
We spent approximately 3 hours together in the same room and communicated over Facebook otherwise.
